Version 1.1.1, Release 1  
October 2008

The Spotfire S+ RTFTools includes the S-PLUS library, S+rtftools, for the creation of Rich Text Format (RTF) reports of clinical report data. This library sits below code developed for specific reports.

### Installation Instructions:

1. Unzip the rtftools.zip file into your SHOME\library directory to install the S+rtftools library.

**S+rtftools:** A library for producing RTF files from within Spotfire S+.

S+rtftools contains mostly low-level functions for writing out RTF files including initialization, writing paragraphs, modifying text styles, writing tables, writing out WMF files to RTF, etc.

To load the library, type the following command in Spotfire S+:

```
library(rtftools)
```

This will load the rtftools library functions.

Please see the readme.txt file in the library directory for more information, as well as the help file and sample script.
